

# Unveiling deeper Investment insights

Our AI platform delivers high-quality, actionable insights with speed and precision. Combining advanced models and expert knowledge, we develop tailored solutions that enhance decision-making. Scalable and secure, our platform ensures compliance and uses cutting-edge AI for informed and effective investment decisions.

## Quant Investing

**Discover alpha generating signals from unstructured data back-tested over 20+ years of history.** Through deep analysis of complex text data, we produce alpha signals, empowering fund managers to identify and capitalize on market opportunities with global coverage and daily updates.

## Thematic Investing

**Unlocking thematic investment opportunities with AI powered insights.** With our AI platform, we can rapidly score over 10,000 companies globally on any theme, from broad topics such as the AI revolution to narrow ones such as carbon storage, offering flexibility and depth to capitalize on thematic opportunities with confidence.

## Sustainable Investing

**Transparent, auditable data solutions, across asset classes.** Our comprehensive data suites, backed by leading industry investors, help you align your investments with standards such as the UN SDGs, EU Taxonomy, and SFDR, ensuring accountability, performance, and compliance.

## PE Investing

**Seamless, standardized sustainability insights for private equity portfolios.** Our solution provides consistent, on-demand sustainability classification for private market companies, ensuring alignment across public and private assets to enhance portfolio analysis and decision-making.

Entis\* is a data-driven investment intelligence company that utilizes advanced AI to analyze global corporate dynamics. By converting complex qualitative data into clear, actionable insights, Entis supports more informed investment decision-making. Our insights are grounded in transparency and precision.

*\*Established in 2018 from Deloitte Netherlands and acquired by APG Group N.V., Entis now operates as an independent entity within the APG family.*
